

# It's been a million laughs.

We're not counting the smiles, grins and giggles. Although 17 years ago, when we

introduced the Suzuki 4x4, we do remember a smirk or two. They were smirks that

said, "Driving in this part of the world is strictly survival of the fittest. And where do we put the chickens, let alone the goat?"

But a funny thing happened on the way from disbelief to Zimbabwe.

Our Suzuki not only survived, people found it a lot of laughs to drive.

Over the years, we've

engineered some serious refinements into our Suzuki. Today, it has a nifty, go-getter engine, 5-speed stick and all the goodies of 4-wheel drive.

One thing we didn't change was the fun. Convertible or hardtop, it's our answer to the boredom of econo-box yawnmobiles.

And as one of the hottest selling 4x4's in the country, it's got people laughing all the way to the supermarket, the office, to class, the beach, the slopes and the boonies. As the lowest priced 4x4, it also has 'em laughing all the way to the bank.

If you're not having fun yet, call 1-800-447-4700 for the name of your nearest Suzuki Samurai dealer. And thanks a million.

It won't open the fun driving door for Samurai. It will only open it for an ordinary passenger car. And keep your eyes and a bright imagination. And always wear your seat belt. For specific details, visit your dealer's showroom.
